

Mercury Mobile Citation

For efficient, portable, electronic citation.

Mercury Mobile Citation is the cutting-edge, mobile electronic citation answer to labor-intensive, manual citation processes. With its user-friendly interface and flexible application requirements, this program will run on any Windows Mobile 5.0 OS—opening the door for cost-reducing opportunities in off-the-shelf hardware solutions.

Electronic entry forms include drop-down menus and direct wireless transfers from your device to central system database servers. Cut down on human error and redundancy; use Mercury as a stand-alone application under your existing citation system, or subscribe to our entire Pantheon of municipal information management systems.

Featuring...

-  **Secure, encrypted systems**
-  **Remote data entry and signature capture**
-  **Mobile integration and electronic citation transfers**
