

Zeus Municipal Court Management Systems

The comprehensive, end-to-end, municipal court management system.

Leap into the next century with Lambodar.'s municipal court data management systems. Whether you oversee a town of thousands or a city of hundreds of thousands, our scalable, web-based applications are designed to help you speed up your system.

Zeus MCMS™ is the answer to the tired, old, paper-oriented filing of yesterday. Utilizing the latest Windows .Net 2.0 and SQL Server 2008 technologies, our applications break away from the archaic, limited software of the past to embrace the next revolution of web technology.

The screenshot displays a web-based form titled "Case Complaint - Affidavit". It is divided into several sections: "Citation Form" with a search bar and radio buttons for citation types; "Violator" with fields for personal and identification details; "Vehicle" with fields for vehicle specifications; "Local" with location-specific information; "Violation" with checkboxes for various offenses; and a "Narrative" section at the bottom with a text area and a small disclaimer.

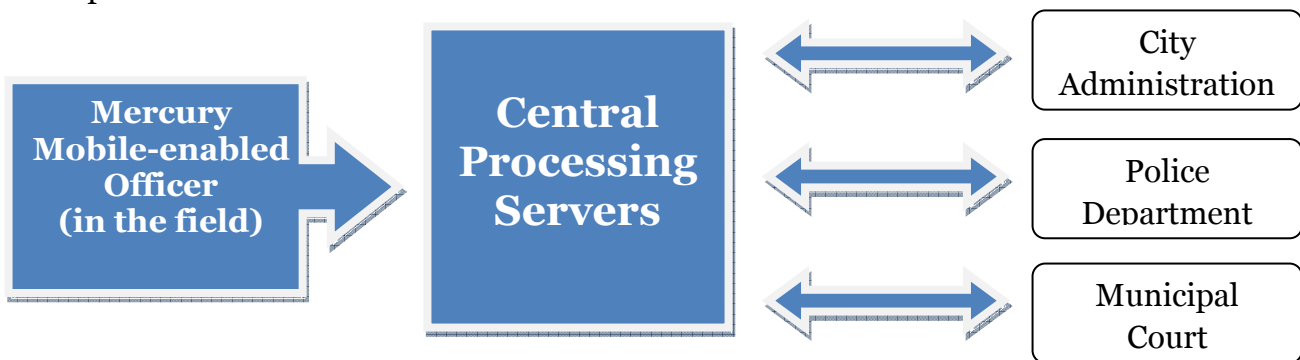

Built on web-based applications with real-time interaction, Zeus MCMS™ will enhance your Court's efficiency while creating greater accessibility for your constituency. Secure, encrypted access and decentralized management allow users to connect from any internet-capable interface in the city, and best of all, *you* define the limits and extent of their permissions.

Featuring...

- Fully scalable applications to meet your city's size and needs.
- Built-in e-payment gateway and POS system to manage online and offline transactions.
- Utilizes the latest Windows .Net 2.0 and SQL Server 2008 technologies.
- Secure, encrypted systems.
- Web-based, secure access from anywhere in the city.
- Mobile integration and electronic citation transfers.
- Easy to use, customizable interface.
- Extensive record keeping including, time stamps and daily report generator.
- Extensive report generation based on multiple fields.
- Imaging solutions for quick scanning and archiving of your old paper trail.
- Low cost for city and state licenses.
- Complete integration into existing systems.
- Don't see your solution here? Let us create one for you!

Streamline the citation process so that you can focus on the issues that matter: your constituency, not the paperwork. Our easy-to-manage citation tracking, docket creation, court scheduling, and payment management services automate the process while eliminating errors. Role-based, authenticated access tracks the identity of your system user, allowing you to maintain complete control over your data. Set advanced administrative rights for high-officials such as judges, and bailiffs, but still offer the ability to give public access to selected fields.

Paired with our Mercury Mobile Citation™ application, Zeus MCMST™ eliminates human error by using a safe, secure, electronic process format that can transfer in near real-time to centralized servers. Officers in the field send citations directly to a central processing server, which then routes all the relevant data to the appropriate departments.

This simple, electronic process makes it easy-to-manage citation tracking, docket creation, court scheduling, and payment records.

With an intuitive, basic interface and highly customizable UI, Zeus MCMS™ takes municipal data management to the next level of operational efficiency.

CaseId	Defendant Name	Collection(\$)
1-7014		\$29
2-7344		\$36
3-5656		\$15
3-4565		\$33
Total		\$113

Define your interface specifications and we'll even customize the screens for your needs. Search and generate report through a number of criteria, including citation number, vehicle number, officer name, date, violation type, and disposition. File and print default daily reports, and manage metric reporting for your constituency. Plus, setup custom templates for court letters, subpoenas, invoices, and even warrants.

Best of all, Zeus MCMS™ boasts superior installation time over previous generation applications. Zeus MCMS™ is ready to go live as soon as your server setup is complete. There are no installation disks to carry over from station to station: all you need are a browser-capable computer and the internet to access.

Contact us today regarding our low-cost, site-based licensing programs for cities and states. Plus, our complete Pantheon package also includes custom integration into state systems, or end-to-end installation and training services.
